

What you test is what you drink!

WELL TESTING PROGRAM

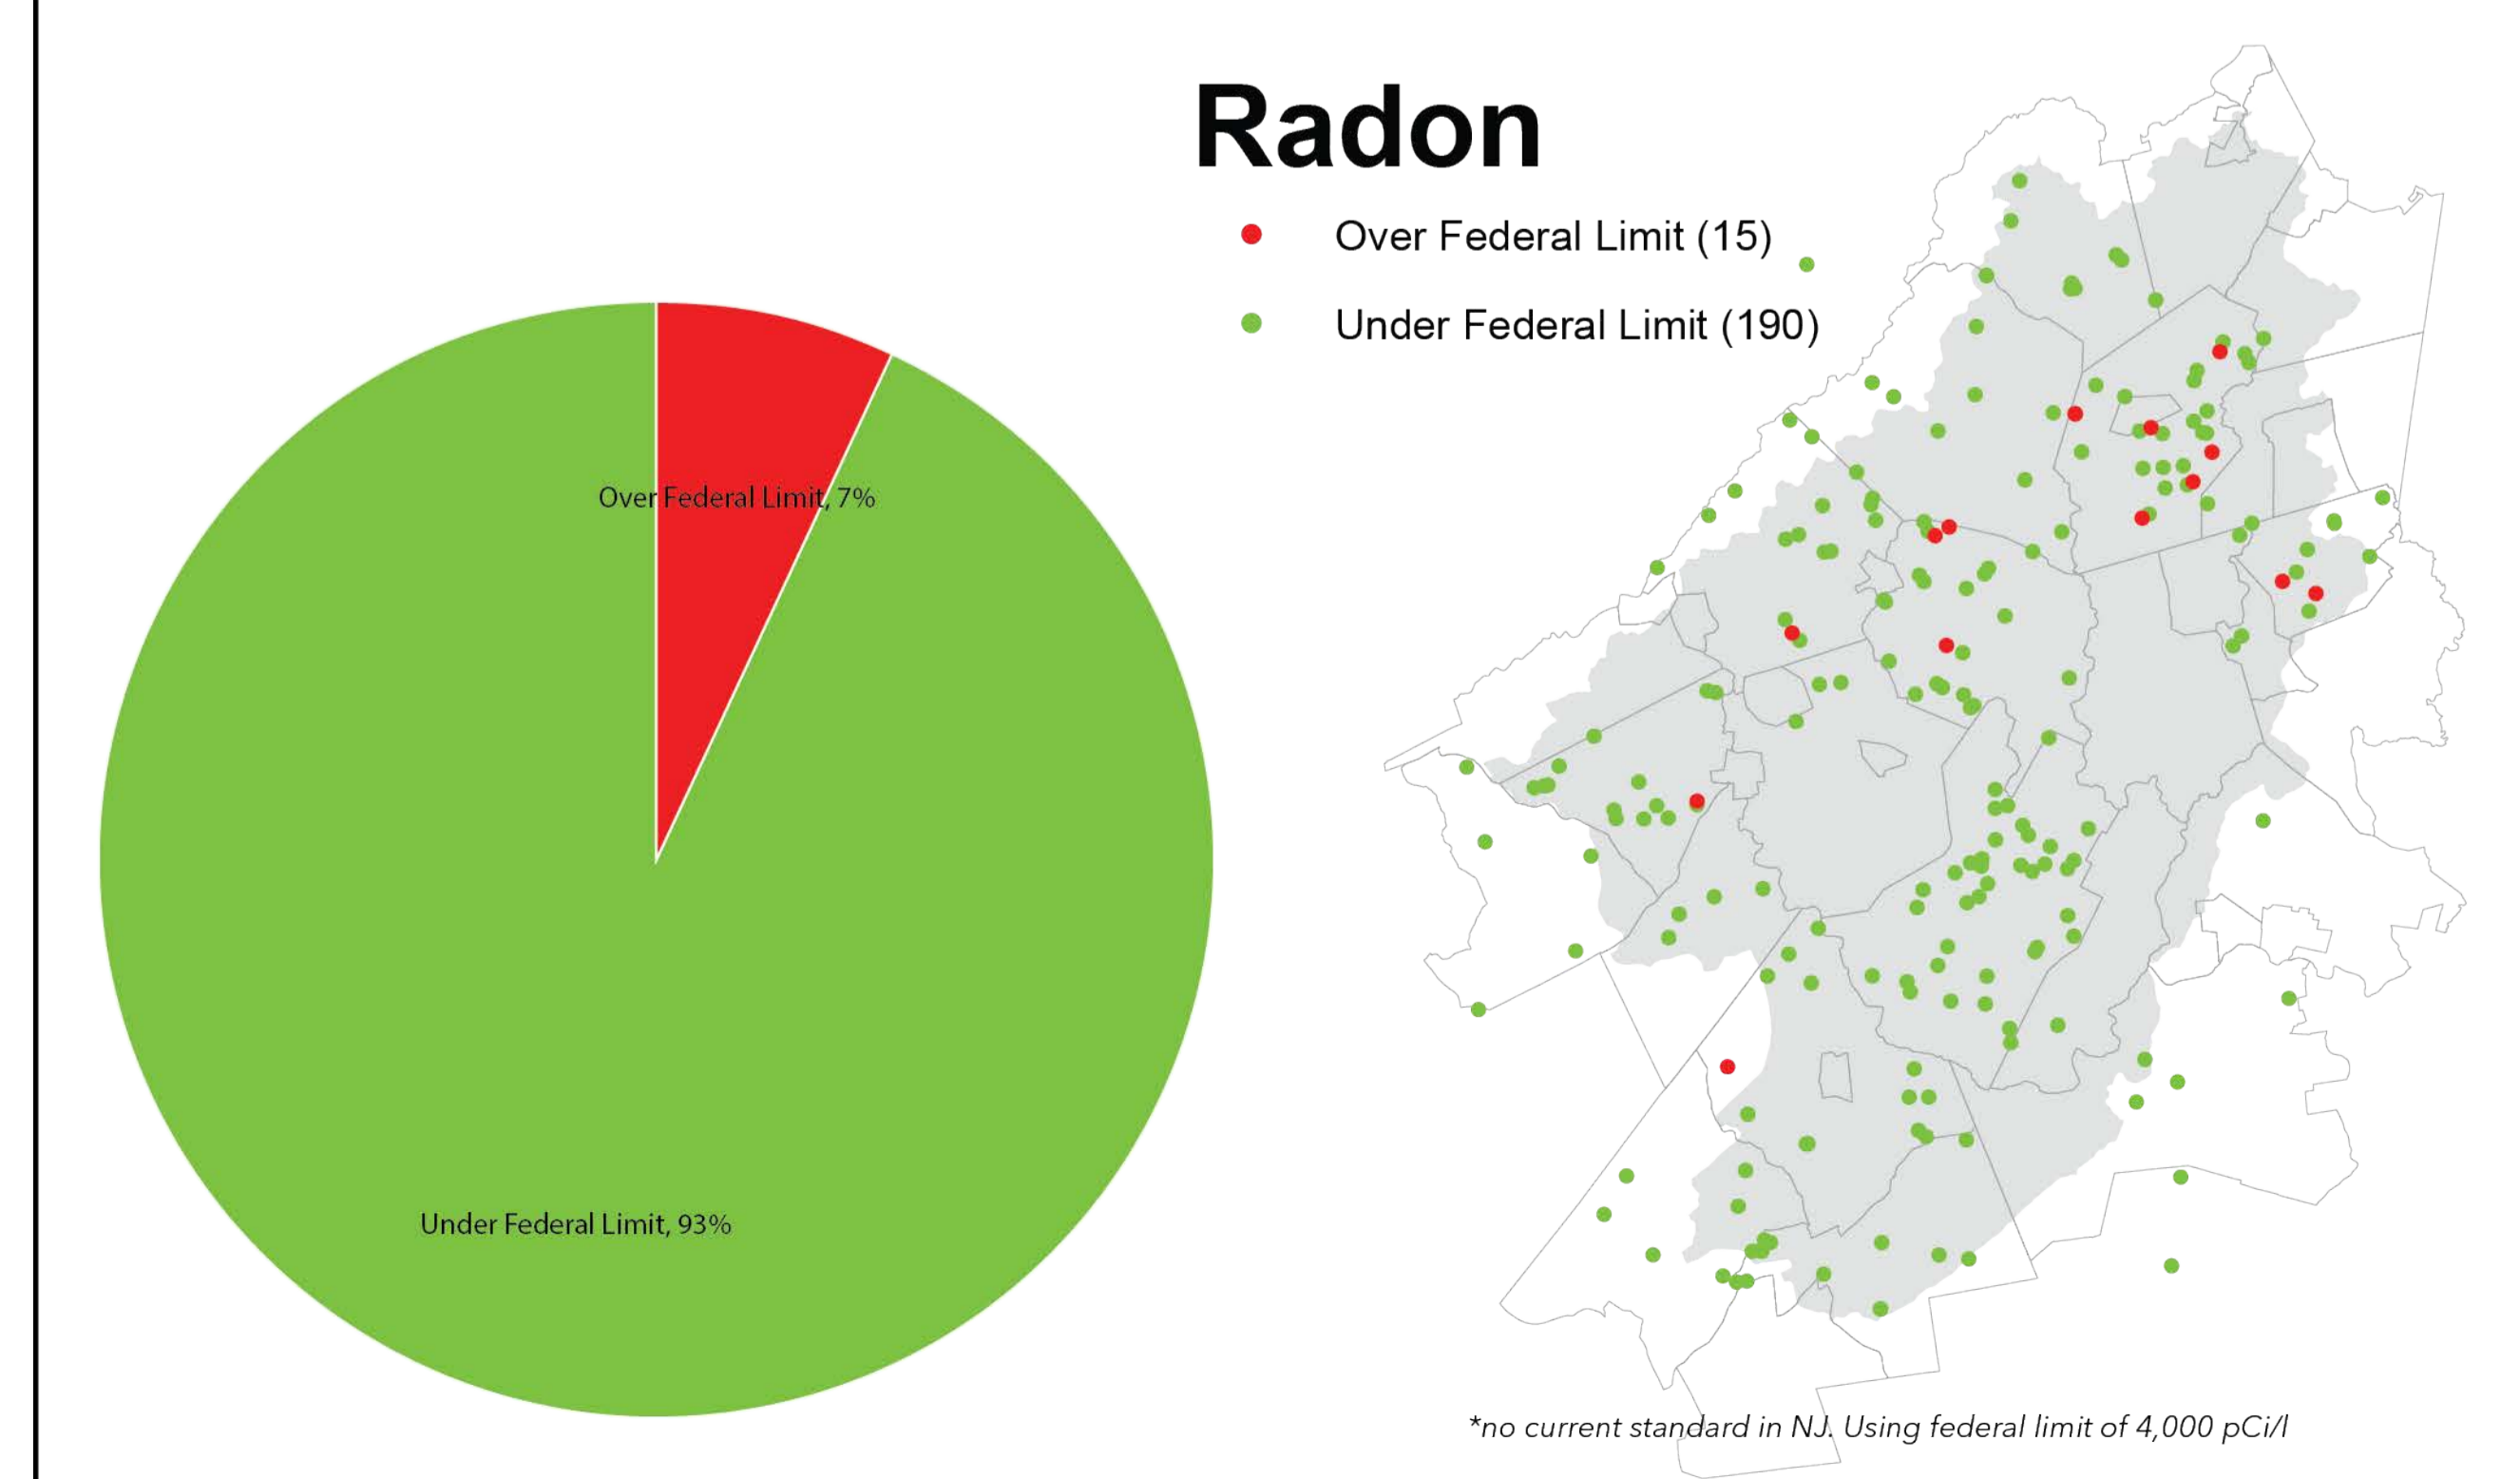

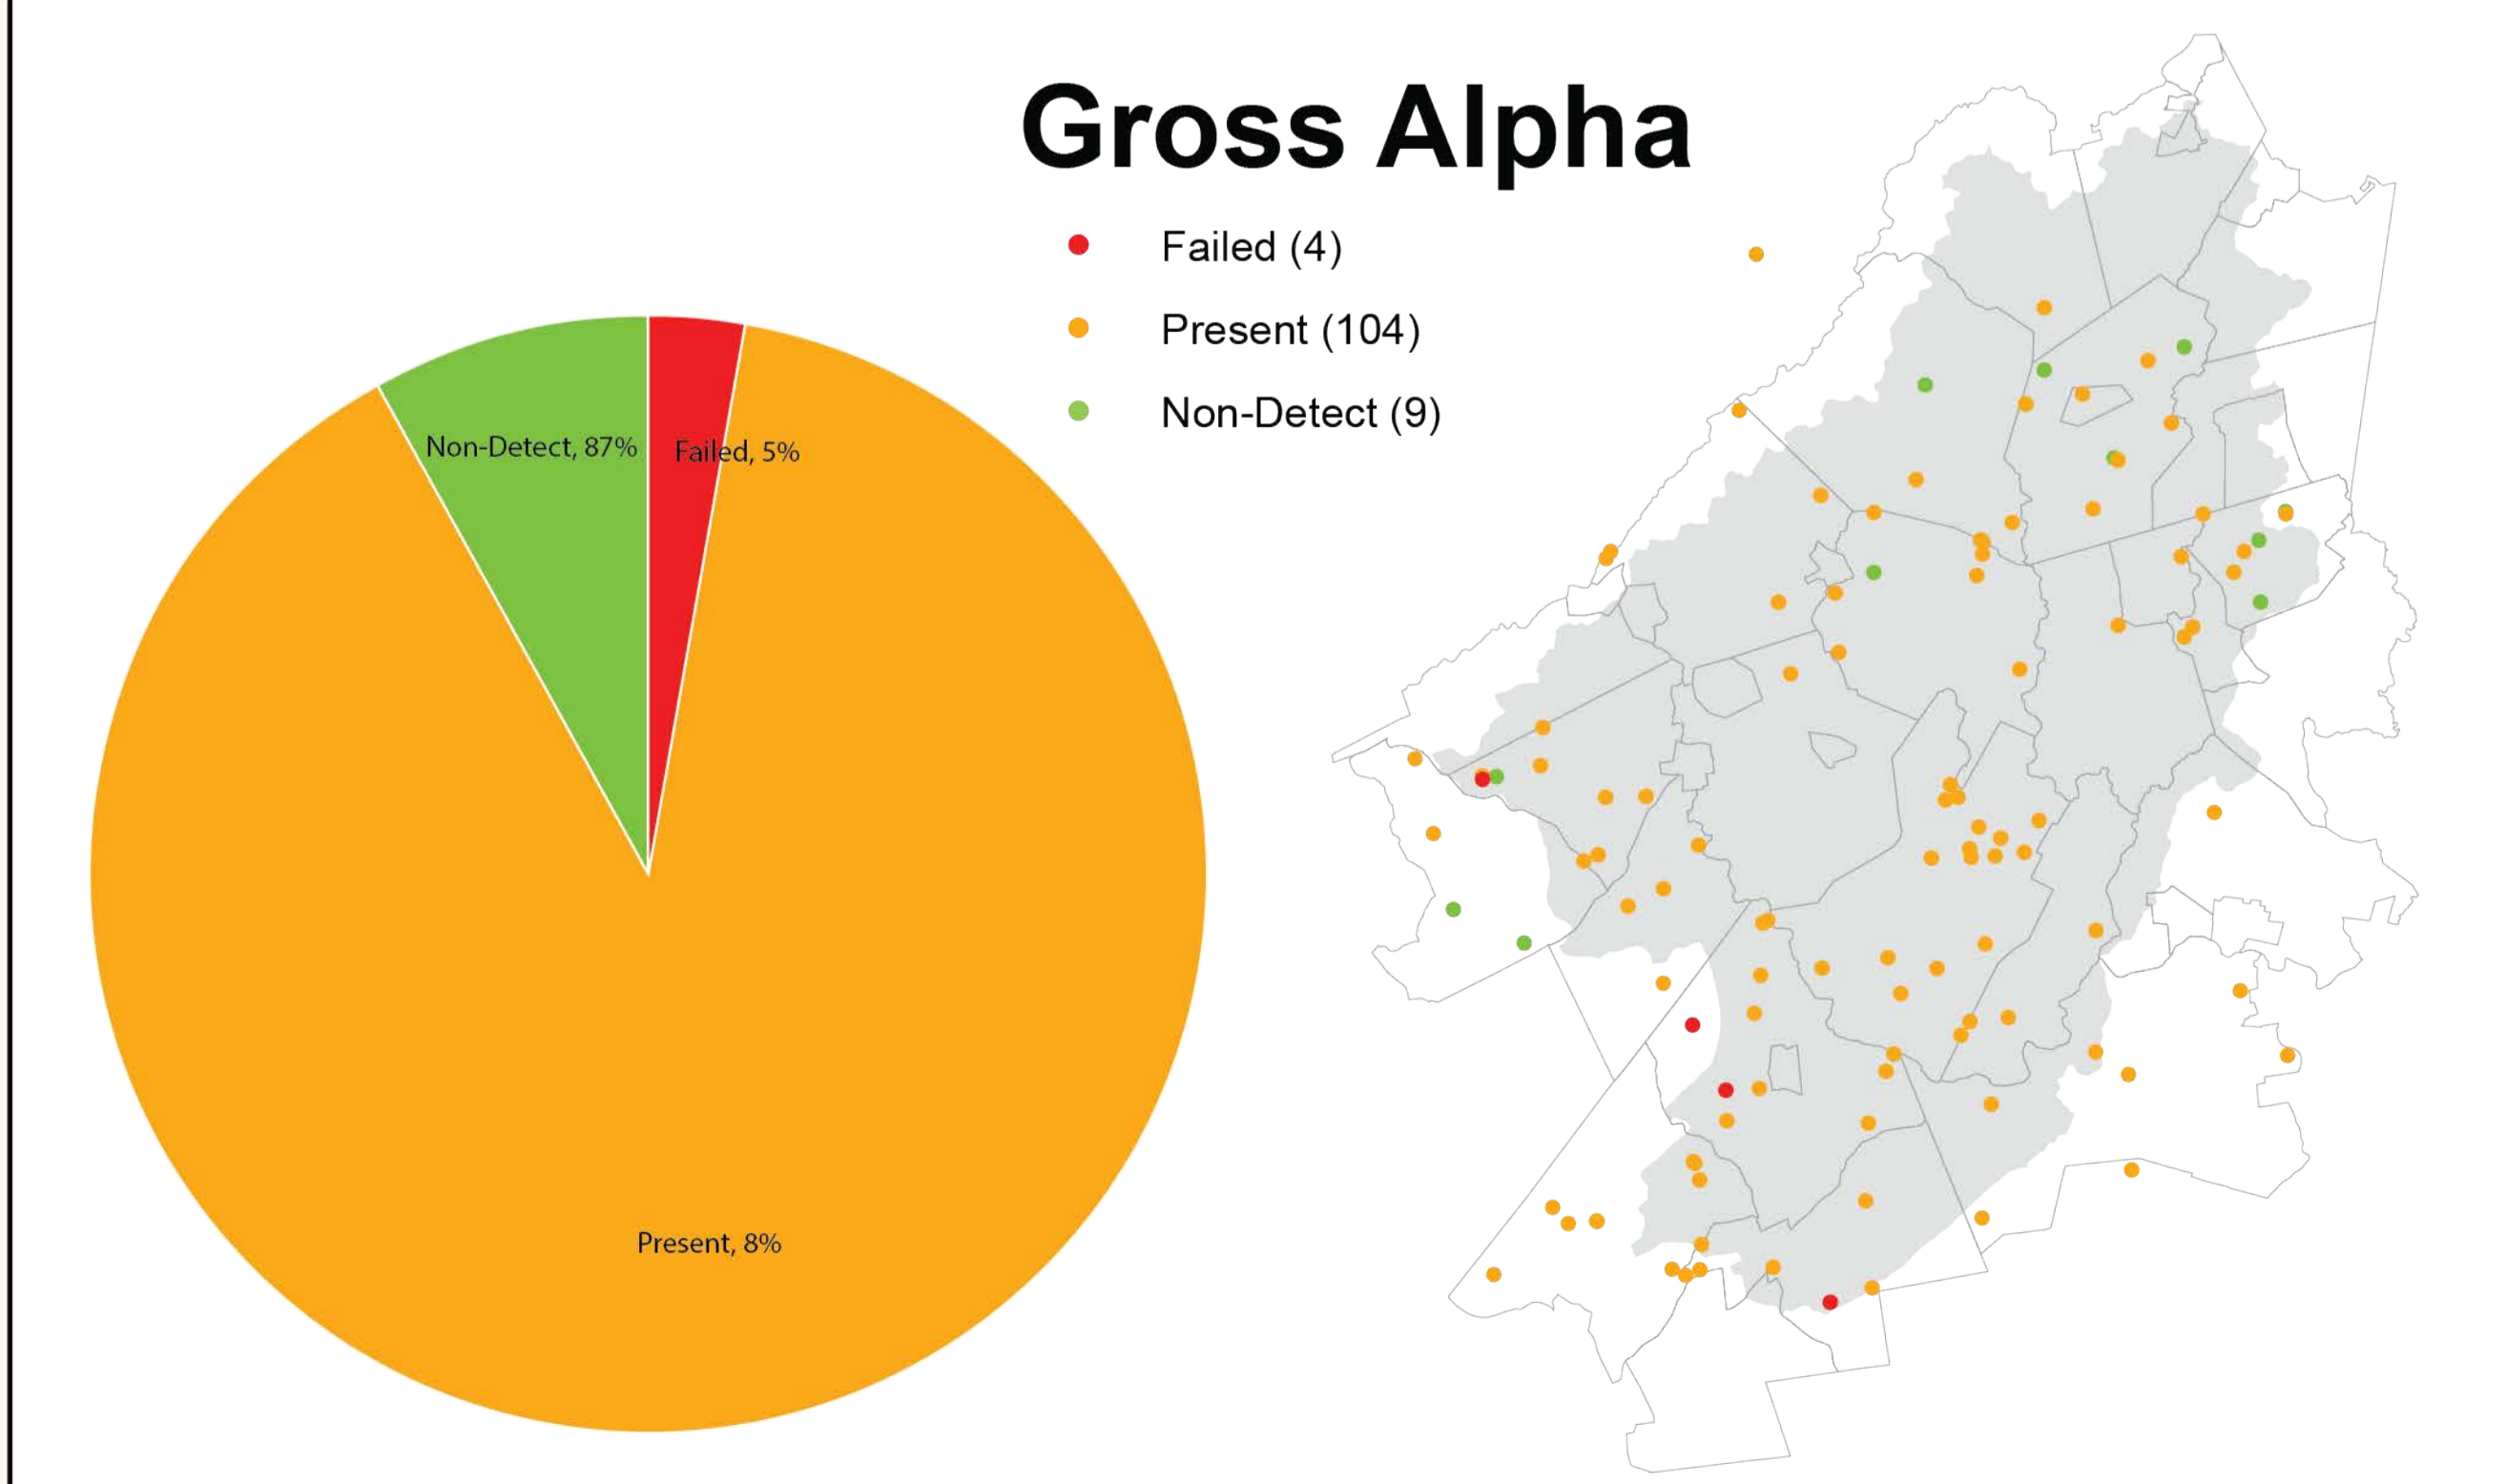

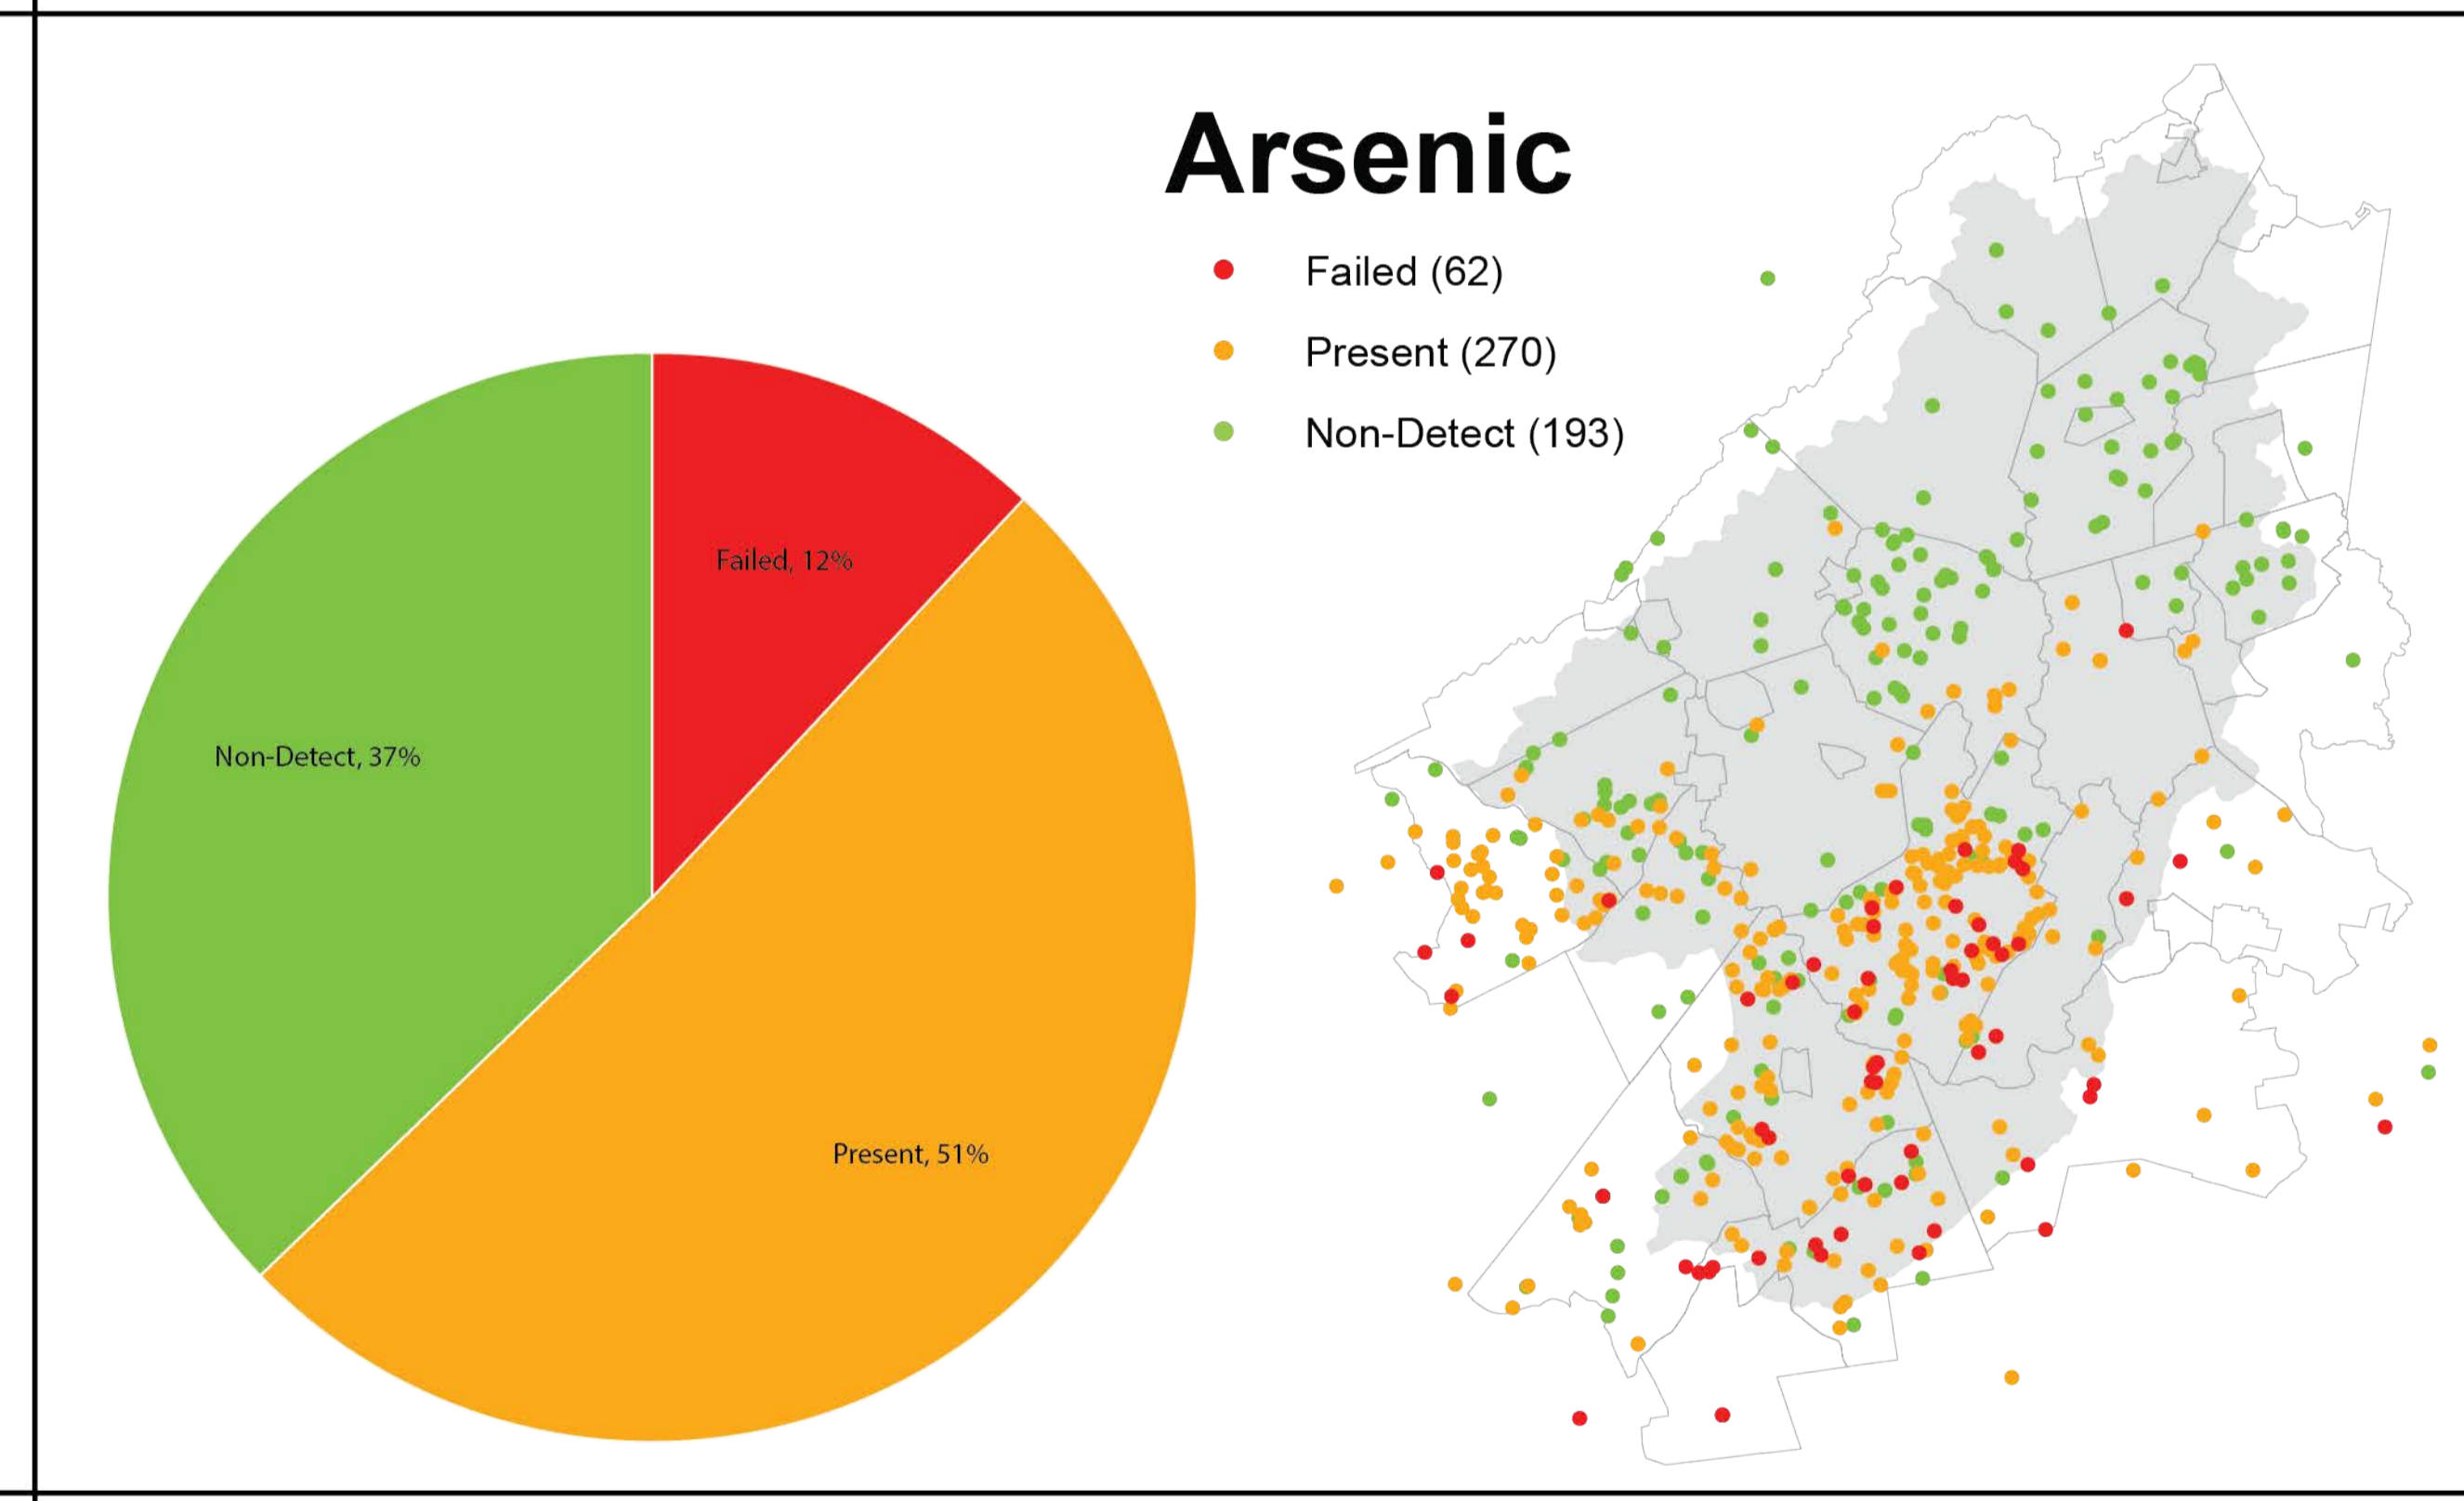

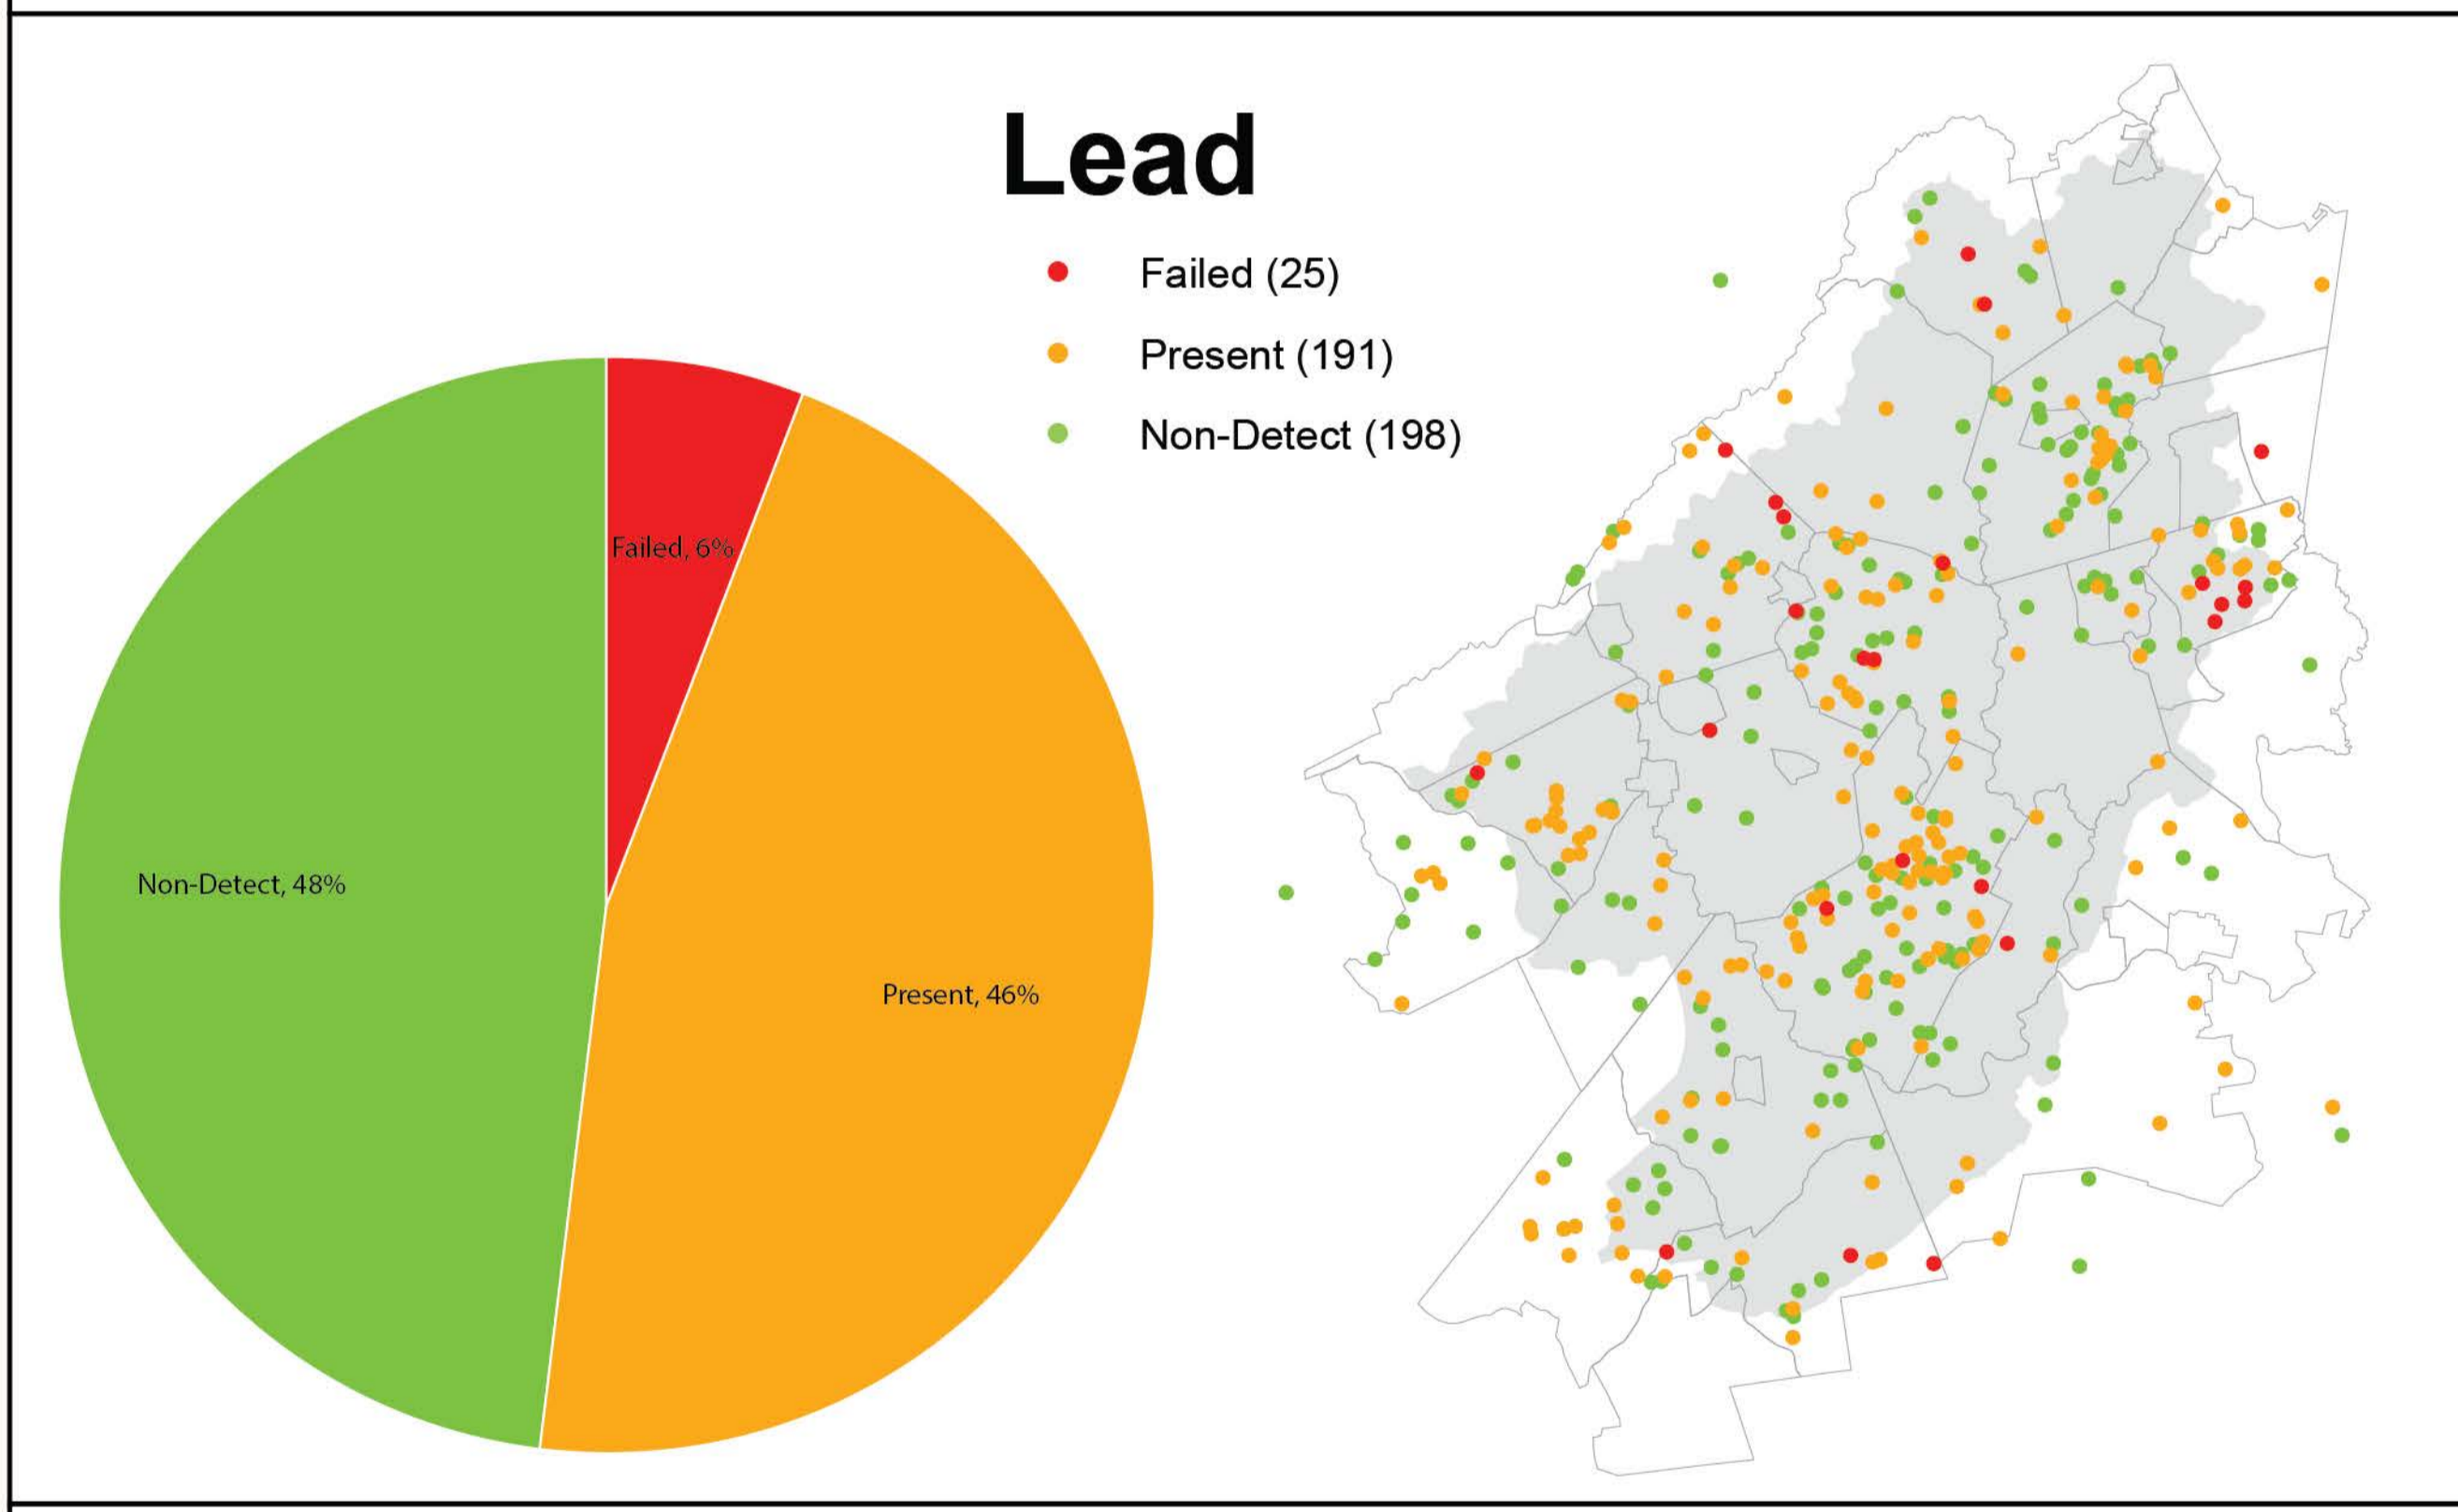

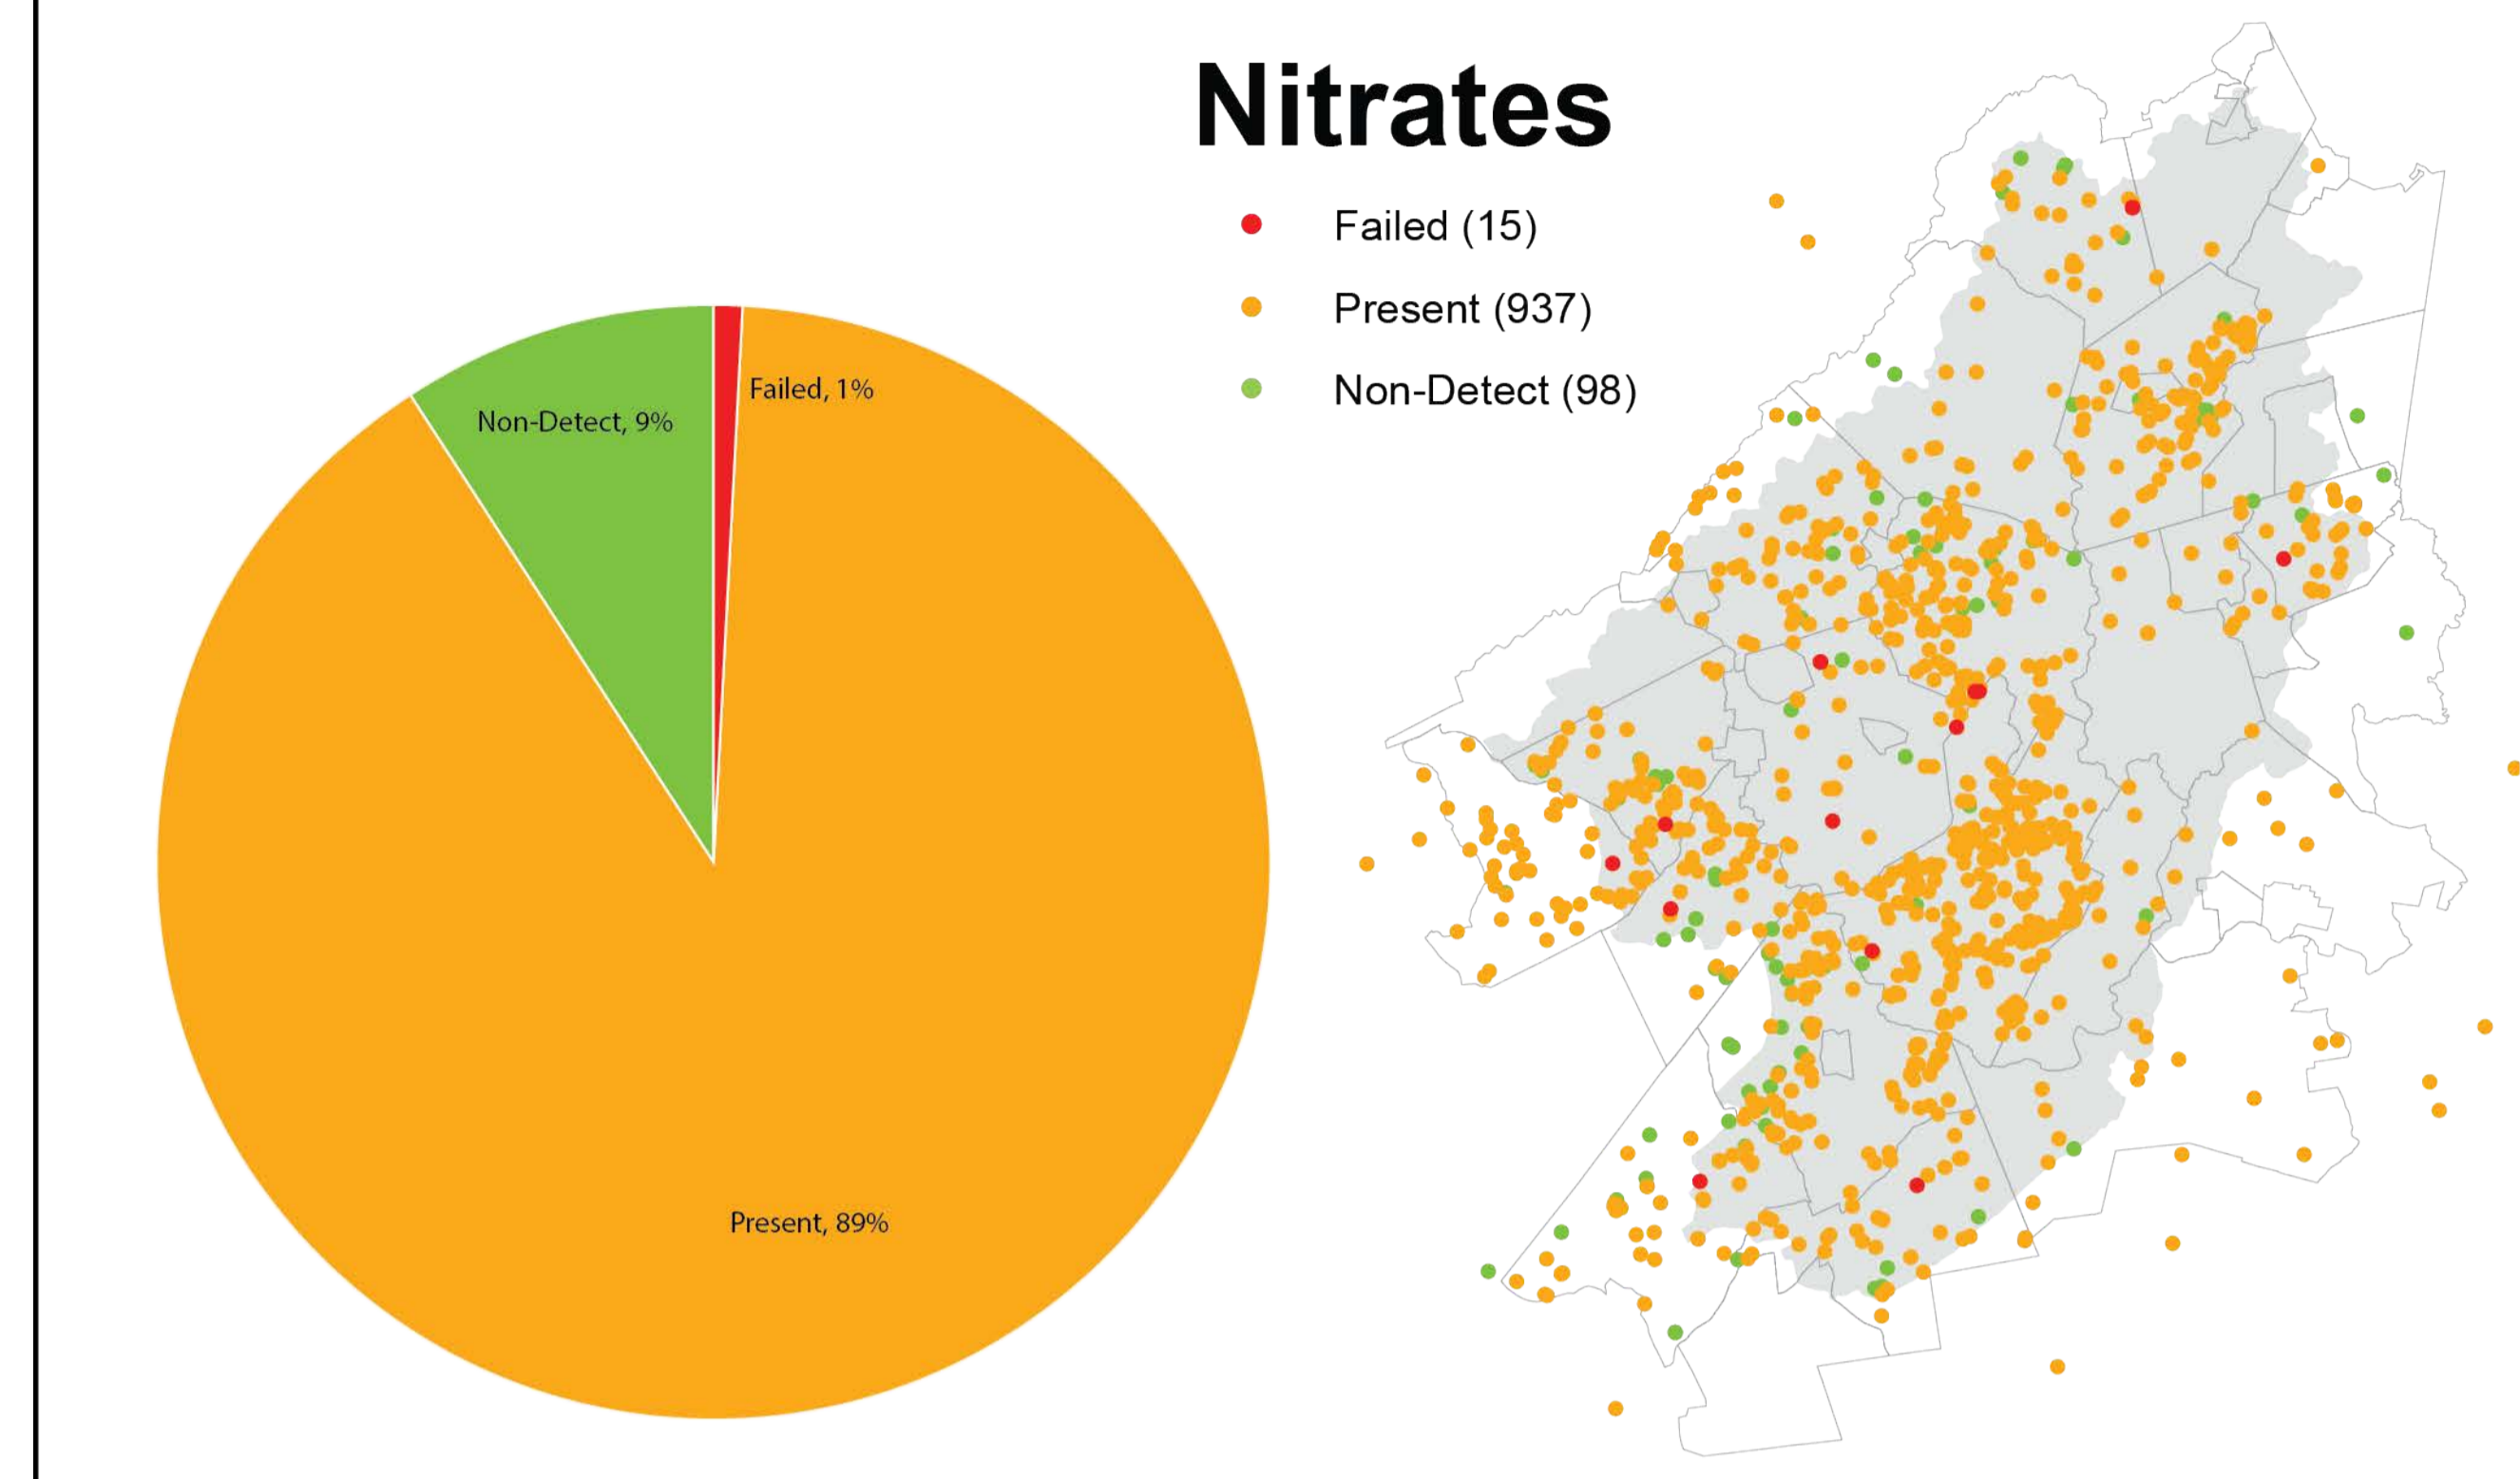

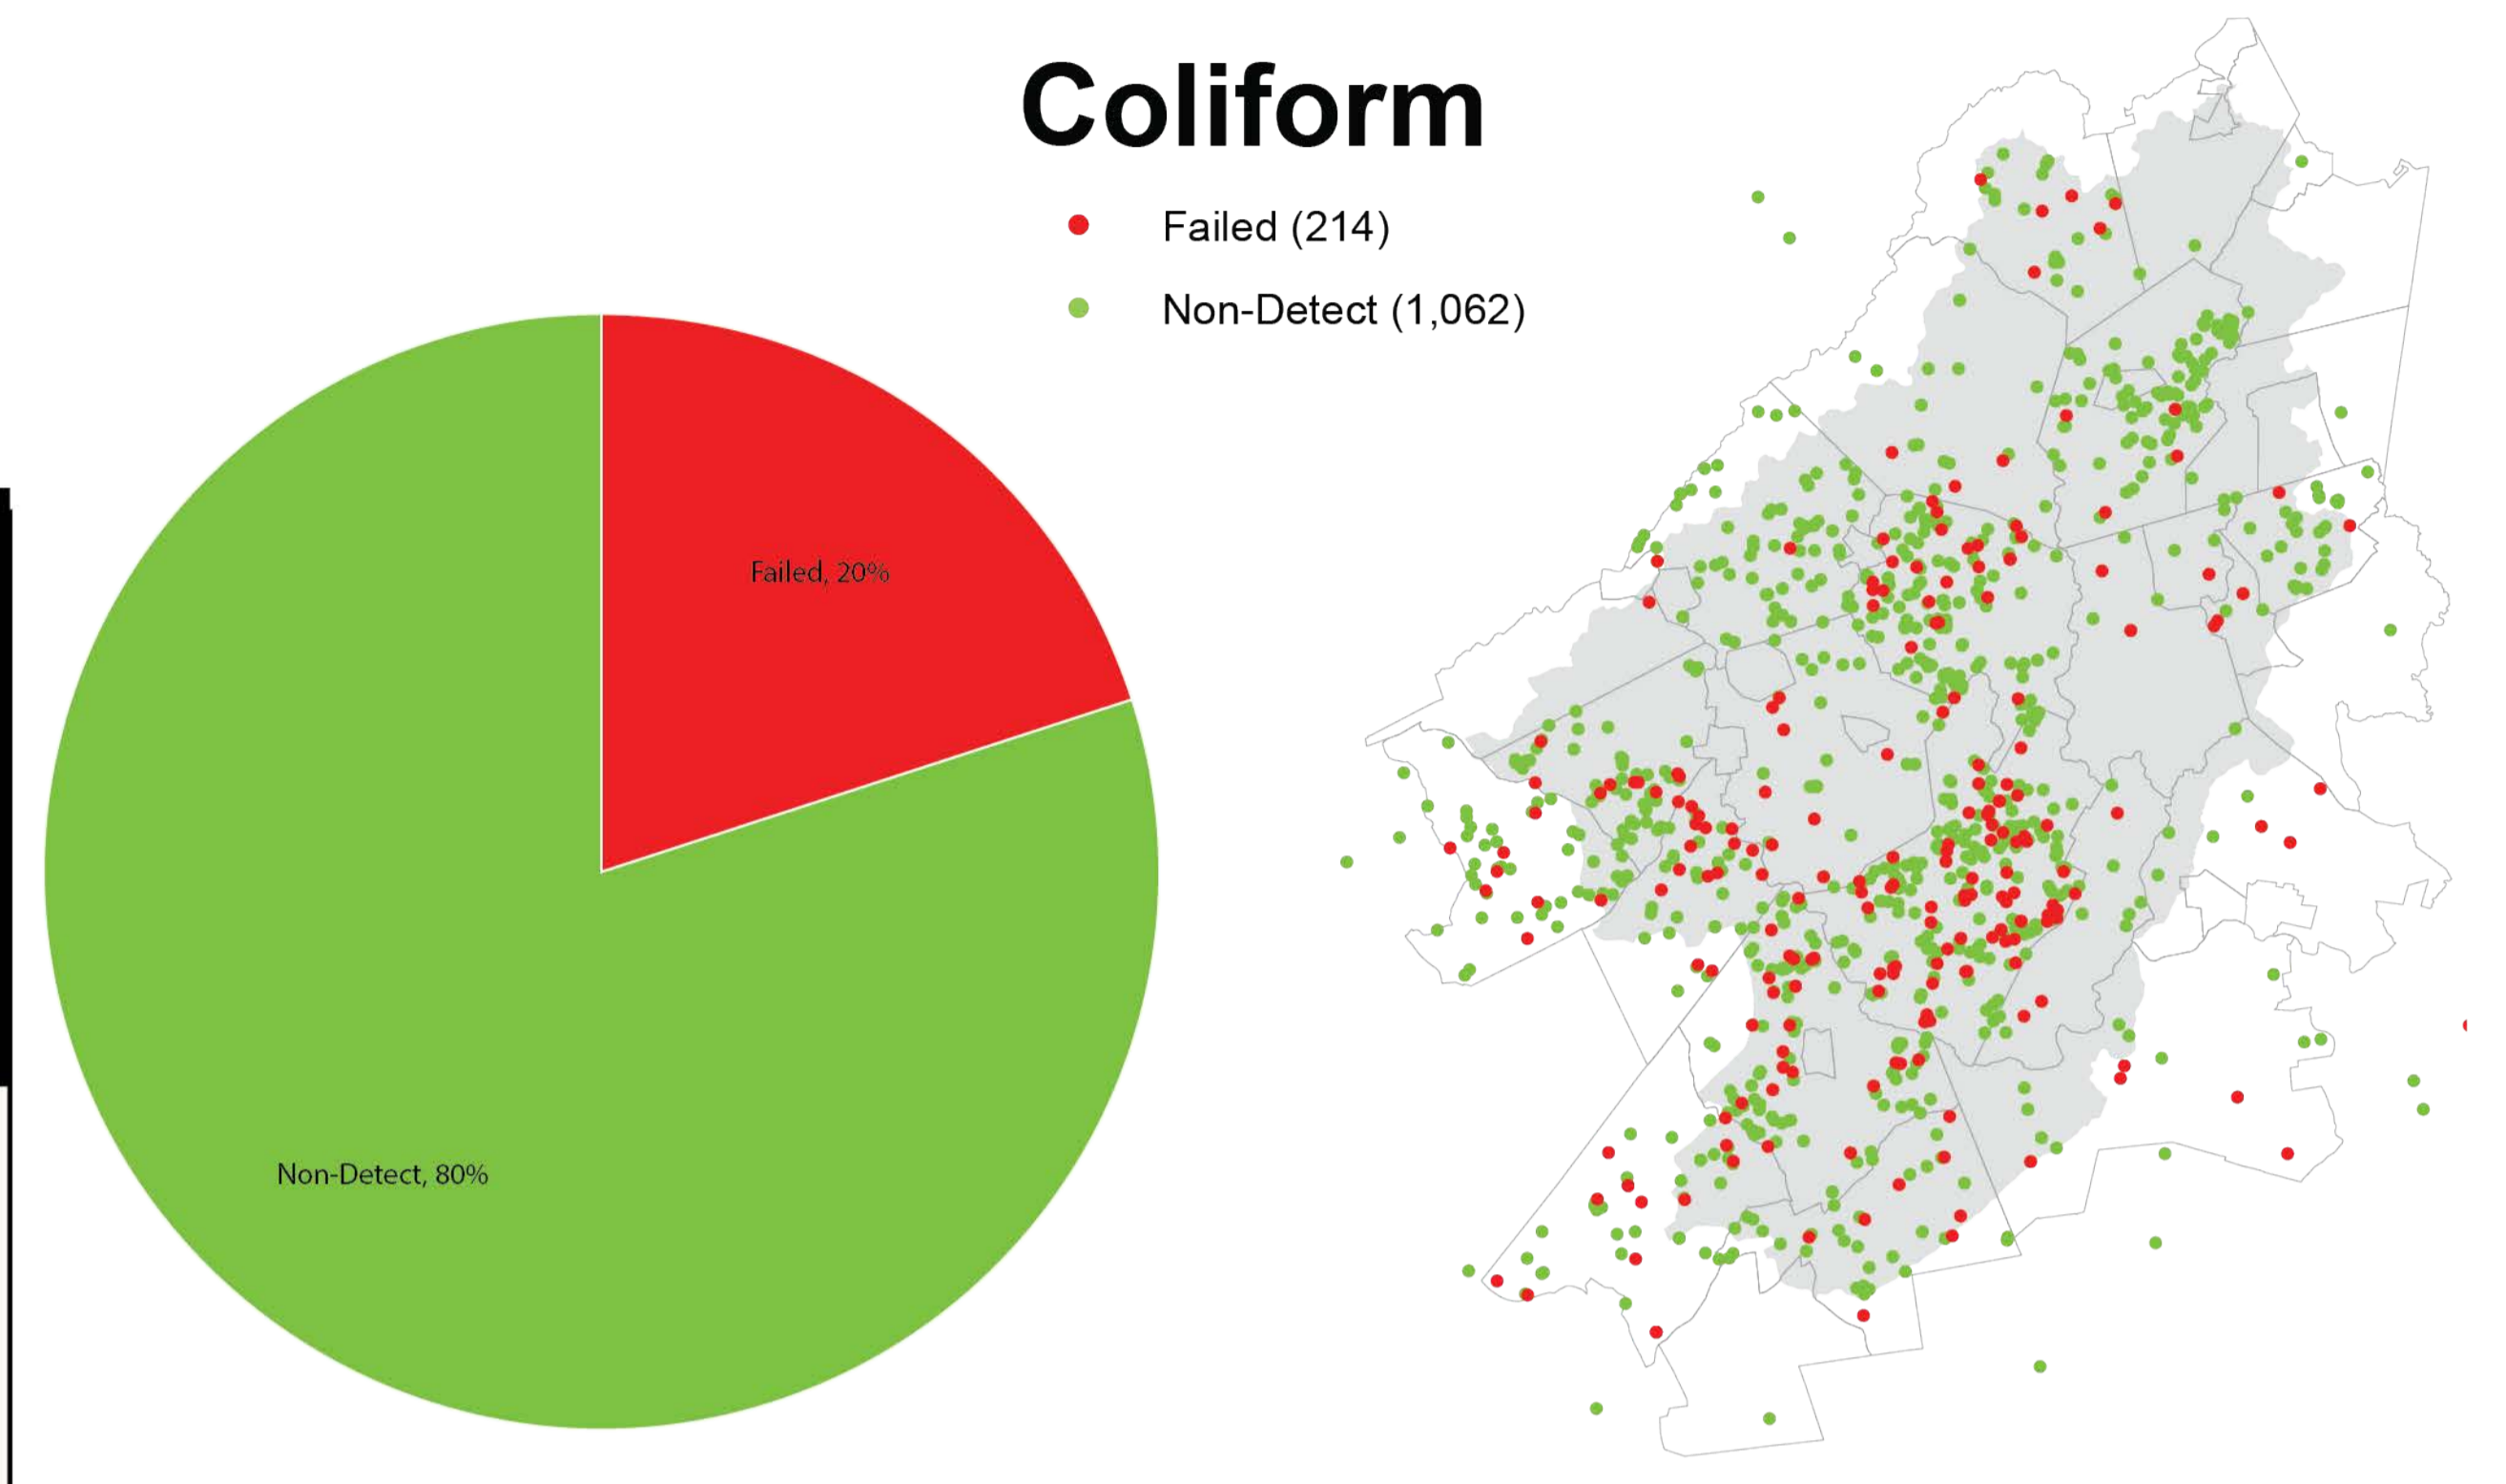

Fall 2017 - Spring 2018

What's in your water? Make sure the water flowing from your tap is pollutant-free. If your water comes from a private well, it's up to you to make sure it is safe to drink!

Well test distribution by .5 mile hexagon grid

80% of the households in our region depend upon wells for drinking water

*no current standard in NJ. Using federal limit of 4,000 pCi/l
