

WELL TESTING REPORT

1,322 Taps Tested across 35+ municipalities **2025**

6,437 individual tests conducted, including:

- Coliform Bacteria & E.coli
- Nitrates
- Volatile Organic Compounds
- Synthetic Organic Compounds
- Radionuclides
 - Gross Alpha and Radon
- Arsenic
- PFAS
- Lead
- Copper
- Manganese
- Iron + more

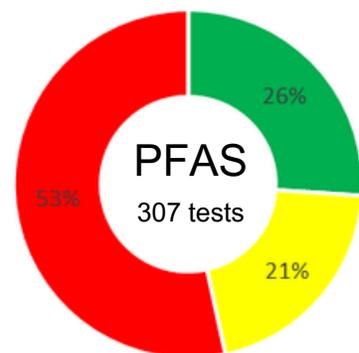

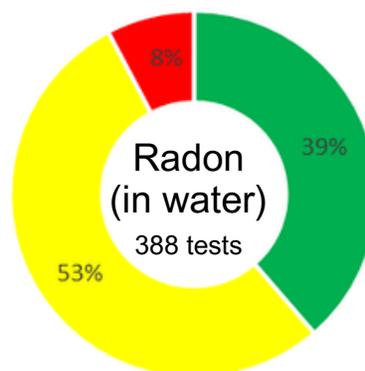

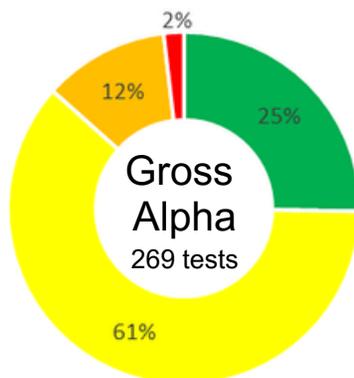

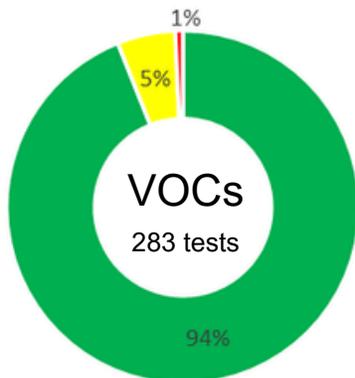

■ Coliform bacteria absent
■ Coliform bacteria present, E. coli absent
■ E. coli present

■ Nitrates under 4 mg/L
■ Nitrates 4-10 mg/L
■ Nitrates failure-- over 10 mg/L

■ Lead undetected
■ Lead detected under 15 ppb
■ Lead failure -- over MCL of 15 ppb

■ Arsenic undetected
■ Arsenic detected under 5 ppb
■ Arsenic failure -- over 5 ppb

■ VOCs undetected
■ At least one VOC detected under limits
■ At least one VOC detected over limits

■ Gross Alpha undetected
■ Gross Alpha detected under 5 pCi/L
■ Gross Alpha detected 5-15 pCi/L
■ Gross Alpha over MCL of 15 pCi/L

■ Radon detected under 800 pCi/L
■ Radon detected 800-4000 pCi/L
■ Radon detected over 4000 pCi/L

■ PFAS undetected
■ At least one PFAS detected under EPA limits
■ At least one PFAS detected over EPA limits
